David Schramm's Universe. Special Volume dedicated to the memory of David Norman Schramm, 1945–1997

editors

Gerry Brown, Marc Kamionkowski, Michael S. Turner

Contents

Introduction ix
Obituary: Remembering David Schramm, Gentle Giant of Cosmology, by Dennis Overbye xi

I. Age of the Universe
B.S. Meyer, J.W. Truran, Nucleocosmochronology 1
W.L. Freedman, The Hubble constant and the expansion age of the Universe 13
L.M. Krauss, The age of globular clusters 33

II. Nuclear astrophysics
J.N. Bahcall, Solar neutrinos: an overview 47
A. Burrows, T. Young, Neutrinos and supernova theory 63
Y.-Z. Qian, G.J. Wasserburg, Stellar abundances in the early galaxy and two *r*-process components 77
D. Arnett, Explosive nucleosynthesis: prospects 109
J.M. Lattimer, M. Prakash, Nuclear matter and its role in supernovae, neutron stars and compact object binary mergers 121

III. Dark matter
M. Davis, The cosmological matter density 147
K. Griest, M. Kamionkowski, Supersymmetric dark matter 167
K. Freese, Death of baryonic dark matter 183

IV. Structure formation
M.J. Rees, 'First light' in the universe: what ended the 'dark age'? 203
J.A. Frieman, A.S. Szalay, Large-scale structure: entering the precision era 215
N.A. Bahcall, Clusters and cosmology 233

V. Cosmic background radiation
E. Gawiser, J. Silk, The cosmic microwave background radiation 245
G.F. Smoot, CMB anisotropy experiments 269

VI. UHE cosmic rays
A.A. Watson, Ultra-high-energy cosmic rays: the experimental situation 309
A.V. Olinto, Ultra high energy cosmic rays: the theoretical challenge 329
F. Halzen, High-energy neutrino astronomy 349

VII. The light elements
E. Vangioni-Flam, M. Cassé, J. Audouze, Lithium–beryllium–boron: origin and evolution 365
K.A. Olive, G. Steigman, T.P. Walker, Primordial nucleosynthesis: theory and observations 389
D. Tytler, J.M. O'Meara, N. Suzuki, D. Lubin, Deuterium and the baryonic density of the universe 409
B.E.J. Pagel, Helium and Big Bang nucleosynthesis 433
L.M. Hobbs, Lithium 449

VIII. Gamma-ray bursts
G.E. Brown, C.-H. Lee, R.A.M.J. Wijers, H.A. Bethe, Evolution of black holes in the galaxy 471
D.Q. Lamb, Implications of recent observational discoveries for the nature and origin of gamma-ray bursts 505
T. Piran, Gamma-ray bursts – a puzzle being resolved 529

Elsevier Science B.V.
